Franziska Boehm at Leibniz podcast “Tonspur Wissen“: Who’s afraid of Artificial Intelligence?

Karlsruhe, November 18, 2024 — How can AI technology be regulated? Can these regulations be implemented at an international level? And why does AI need to be regulated at all? Journalist Ursula Weidenfeld talked to Prof. Dr. Franziska Boehm from FIZ Karlsruhe about these exciting questions as part of the Leibniz podcast “Tonspur Wissen”. Among other things, Prof. Boehm explains why it is important to know the quality of the data used to train artificial intelligence, why AI nevertheless reproduces prejudices and may therefore act in a discriminatory manner, which AI systems, such as automated recognition, are classified as “high-risk systems” and which AI practices are prohibited - and why. In this episode, Franziska Boehm also explains the new EU directive on the regulation of AI systems and the resulting challenges and opportunities for the development and use of AI.

.....
FIZ Karlsruhe – Leibniz Institute for Information Infrastructure is one of the leading addresses for scientific information and services and a member of the Leibniz Association. Our core tasks are to provide science and industry with professional research and patent information and to develop innovative information infrastructures, with, for example, a focus on research data management, knowledge graphs and digital platforms. To this end, we conduct our own research, cooperate with renowned universities and research associations and are internationally and interdisciplinarily networked. FIZ Karlsruhe is a non-profit limited liability company and one of the largest non-academic institutions of its kind. For more information, please visit www.fiz-karlsruhe.de/en
