EU-US data protection agreement: The perennial issue of data transfer

Prof. Franziska Boehm publishes a study on the EU-US Data Privacy Framework together with the CEPS and the University of Liverpool.

Karlsruhe, May 21, 2024 – The third attempt by the US administration to grant EU citizens and EU residents adequate protection in the transatlantic transfer of their data also does not appear to stand up to critical legal scrutiny. We are talking about the EU-US data protection agreement negotiated by the European Commission, the EU-US Data Privacy Framework (DPF).

Prof. Dr. Franziska Boehm, in collaboration with one of the leading European think tanks, the Centre for European Policy Studies (CEPS) and Prof. Dr. Valsamis Mitsilegas (University of Liverpool), has written a detailed report on the legal assessment of the aforementioned regulations. According to the CEPS Task Force Report: "Reconstitutionalizing Privacy - EU-US Data Transfers and Their Impact on The Rule of Law, Rights and Trust", the necessary EU standards for lawful transatlantic data transfers are once again not sufficiently met, in particular the principles of the General Data Protection Regulation (GDPR) and the EU Charter of Fundamental Rights are not complied with.

FIZ Karlsruhe – Leibniz Institute for Information Infrastructure is one of the leading addresses for scientific information and services and a member of the

Leibniz Association. Our core tasks are to provide science and industry with professional research and patent information and to develop innovative information infrastructures, with, for example, a focus on research data management, knowledge graphs and digital platforms. To this end, we conduct our own research, cooperate with renowned universities and research associations and are internationally and interdisciplinarily networked. FIZ Karlsruhe is a non-profit limited liability company and one of the largest non-academic institutions of its kind. For more information, please visit www.fiz-karlsruhe.de/en
